SONICWALL

# Lead the Way with Gen 8

SonicWall's most advanced platform yet. Stack three discounts through January 31.

Your customers rely on you to keep their networks safe, but AI-driven threats are moving fast. Leaving them on an aging firewall is not an option. For next-gen threats, they need next-gen protection. At the same time, tool sprawl, alert fatigue and the cybersecurity skills shortage are making security harder and more expensive to manage.

With Gen 8, you can deliver stronger security to your customers on our most advanced platform yet. It is built to simplify operations for you and your customers. And with technology costs rising, waiting only eats into your profitability.

**From now through January 31, 2027, you can help your customers beat the recent price increase and grow your upgrade business with a simple plan:**

- Trade in a Gen 5, 6 or 7 firewall and purchase a 3-year APSS and get an extra 7% off (on top of your base partner discount)
- Register your deals of $5,000 or more to stack an extra 8% off
- That's a potential extra 15% off stacked on top of your base partner discount

**To help you close deals faster, we're also including added value at no extra cost:**

- **6 months of Elite Support,** usually reserved for top accounts, with direct access to a Level 3 engineer (on Gen 8 NS*a* upgrades only)
- **Secure Check**, a full review of your customer's current SonicWall firewall including fixes and a risk score
- **9 months of Managed Detection and Response** (MDR) on SonicWall Endpoint Security (SES) seed licenses with Gen 8 and 3-year Advanced Protection Security Suite (APSS)

What are you waiting for? Book a meeting with your SonicWall representative to take advantage of this offer before January 31.
